

## WALNUT QUALITY ADJUSTMENT SCHEDULE

### BASED ON DFA INCOMING WALNUT INSPECTION

#### Shelling Stock – All Varieties

##### Price Adjustment for Serious Defects

Base: 7% serious defects - no price adjustment  
 Below 7% serious defects – positive price adjustment  
 Above 7% serious defects – negative price adjustment

Using the following formula:

$$\text{\$ ADJUSTMENT} = \frac{7 - \% \text{ defect}}{7} \times 0.1$$

\* Note that % blows is considered a serious defect.

##### Price Adjustment for Color

Base: 70% light – no price adjustment  
 Below 70% light – negative price adjustment  
 Above 70% light – positive price adjustment

Using the following formula:

$$\text{\$ ADJUSTMENT} = \frac{\% \text{ light} - 70}{30} \times 0.1$$
